Among the numerous discoveries Science has made in this generation to facilitate the business of life—therefore to employ and even saving the term of real existence, man can do no more than to make use of them, thus contributing to humanity to the blessing Arts. A variety of its virtues through our small country, has given birth to a class, the use of which is now common in every city known, as every country I have come to, the numerous cases of pulmonary disease which have hitherto kept us from mid-thousands and thousands every year, indeed, there is now abundant reason to believe a Remedy has at length been found which can be relied upon to cure the most dangerous affection of the lungs. Our space here will not permit us to publish any portion of this effectuated by us, but we would present the following opinion of eminent men, and refer further inquiry to the circular which the Agents have issued, will always be pleased to furnish here, wherein are particular, and indubitable proof of these facts.

CONSUMPTION NO OPIUM.

This is a certain medicine, salve or ointment, whatever, but is composed entirely of the best Herbs and vegetable substances which have a specific influence upon the lungs, and are well known to remove all the symptoms of consumption, & other diseases of the lungs, & it is to all intents and purposes equal to any other nostrum which would be required to remove the phlegm and mucus from the Throat and Air-Passages, thus removing all the obstructions, & giving a free passage to the air, and removing all the causes which would be injurious to the lungs themselves. Every individual can more thoroughly remove the mucus from the lungs, & other parts of the body, than any other nostrum which is much mischievous to the system, and has the foundation for incurable CONSUMPTION. It also exerts a decided action upon the heart, & lungs, & removes all the obstructions to the circulation, & restores the heart again to healthy action. This Medicine, therefore, is not a panacea merely, which only cures the disease, but it cures the disease, and restores as it were at the root of the disease, and removes it, removes at once all the intense and attendant consequences. This is its distinguishing characteristic—a property unique in equal power to any other medicine of the nature, and before the time of its introduction.

CHURCHILL, A. S.

As an ordinary medical practitioner can fully explain the nature and merits of this article, the Proprietor have published a new Circular, giving history of the medicine, the descriptive nature, & its principal ingredients, are designed to inform the public of the value of this medicine.
